Infant and Early Childhood Mental Health Resource Directory

About the Duluth-Proctor-Hermantown Thrive Initiative

The Duluth-Proctor-Hermantown Thrive Initiative is one of six pilot sites taking part in the statewide Minnesota Thrive Initiative led by the Northland Foundation and the five other Minnesota Initiative Foundations. The mission of this statewide collaboration is to promote the healthy social and emotional development of young children, ages 0-5, by strengthening local resources and support networks. More than 60 people representing a wide array of community sectors are members of the Duluth-Proctor-Hermantown Action Team. Together, these individuals have created a vision and strategic action plan to build a stronger, more connected network of education, prevention, and intervention resources for early care and education providers, K-12 educators, mental health and medical professionals, social service providers, and – most importantly – young children and their families.

About the Infant and Early Childhood Mental Health Resource Directory

This directory is an outgrowth of the work of the Duluth-Proctor-Hermantown Thrive Action Team. It summarizes the services available to young children and their families in the Duluth, Proctor, and Hermantown communities as reported by these agencies and organizations. The purpose of the directory is to better facilitate the delivery of services to support the healthy social and emotional development – infant and early childhood mental health – of young children ages 0-5.

If your organization would like to be included in a future edition of the Directory, please contact the Northland Foundation (info@northlandfdn.org).

The Infant and Early Childhood Mental Health Resource Directory is also available online at www.northlandfdn.org. You may also request a printed copy from the Northland Foundation.

For more information about the Duluth-Proctor-Hermantown Thrive Initiative please contact:

At-A-Glance Guide and Index for Resource Directory Services

The Duluth-Proctor-Hermantown Infant and Early Childhood Mental Health Resource Directory provides information on community services and resources across the infant and early childhood mental health continuum of care. Each organization featured in the Directory outlines the types of services it provides across this continuum of care. An explanation of the continuum of care and the definitions of types of services are outlined below. The At-A-Glance Index that follows lists agencies and organizations by types of service.

Infant and Early Childhood Mental Health Continuum of Care

Promotion/Prevention P/P	Early Intervention EI	Intervention I	Intensive Intervention II
Activities and opportunities available to all young children and their families, through a variety of community settings, to promote positive social and emotional development.	Services for families with young children who present behavioral concerns but have not had a mental health diagnosis.	Services for families with young children with a mental health diagnosis but who continue to function in the community with appropriate supports.	Services for families and their young children with severe mental health issues who have difficulty functioning well in the community.

Definitions of Types of Service

Case Management

Process of helping families with accessing services and/or the process of coordinating services for families. This is different than a case manager, which is a person who coordinates service access for families and children.

Child Care

Formal or informal non-parental care of minor children.

Crisis Services

A person or family that requires evaluation/consultation or therapeutic services (within a short time frame, 12 to 48 hours) in order to provide immediate stabilization. Evaluation and consultation are generally provided on an outpatient basis. Crisis services are provided to a family or individual to deal with a situation that is going to become more significant if issues are not addressed immediately.

Day Treatment

A therapeutic setting that provides a small classroom size in addition to 3 hours of intensive group therapy that includes skill-building in the areas of social, emotional, and independent living skills. Individual and family therapy are also provided within this program. Child is required to have a mental health diagnosis to be admitted to this program.

Domestic Violence Services

Services include education, screening, referral, and follow-up of individual and families for the purpose of promoting safety, support, and advocacy.

Early Childhood Education

A pedagogical approach of supporting the educational needs of children from birth through 8 years of age.

Family/Community Support - "Family Advocacy & Community Support"

Providing support to a family as a whole (mobilizing resources to benefit the family or individual in a coordinated way). Connects families with the "Infrastructure" of community services.

Health Care (combines the following categories)

- Health information/education and nutrition education
- Medical diagnosis, referral, treatment and planning
- Hospital room visits
- OT, Speech Therapy, and PT
- Prenatal care
- Prevention and early identification

Home Visits

An intervention strategy that includes visitation of parents and children in their home by trained personnel such as nurses, social workers, teachers, or other professionals or paraprofessionals or community peers who convey information, and/or offer support, and/or provide training on a one-on-one basis.

In-Home Counseling

Mental health services that are provided within a family's home by a trained mental health professional.

Inpatient Services

Hospitalization for medical, social, and psychological evaluation and monitoring of an individual. Generally an individual is placed on a hold for 72 hours due to fear of risk of harm to him/herself or others. Generally inpatient services are provided during a crisis situation due to very serious mental health needs of an individual or family.

Mental Health Referral

The process of referring families outside of a particular agency/organization/program for a more thorough evaluation by a mental health professional and/or specific intervention services. The person referring is trained in recognizing mental health issues or concerns.

Outpatient Services

Diagnostic assessment, individual treatment planning, psychological testing, individual, group and family therapy, physician visits, and medication management outside of the hospital or home within a community mental health setting.

Parent Education

Broad array of skill-building services or activities that are directed to parents to assist them with parenting their children and to connect them with the community. From an educational perspective, parent education is defined as providing educational services to parents by a licensed parent educator.

Parenting Support

Providing direct support and information to the parent to assist them in working with their children more effectively. It may include a continuum of care for parents such as advocacy, education, relationship-building, etc.

Psychiatric Consultation

Consultation of risk and benefits of medication to address psychological problems conducted by a psychiatrist or certified nurse specialist.

Psychological Consultation

Licensed Psychologist renders a professional opinion of an individual following an in-depth interview in addition to psychological assessments to derive a diagnosis to treat or to refer for additional services. This can be a person, entity, or organization.

Therapeutic Classrooms

Small class with a teacher and a psychologist, providing services to the parent/child dyad. Intentional team approach focused on meeting the mental health needs of each child.

Duluth-Proctor-Hermantown Minnesota Thrive Initiative Overview

What is the Duluth-Proctor-Hermantown Minnesota Thrive Initiative?

The Minnesota Thrive Initiative was created by the Northland Foundation and the five other Minnesota Initiative Foundations (MIFs) to strengthen local support networks to ensure the healthy social and emotional well-being of young children, ages birth to five. In January 2007, the six Thrive pilot sites were initiated – one in each MIF region. The Northland Foundation's pilot site is comprised of the **Duluth, Proctor, and Hermantown** communities.

More than 60 Action Team members representing many community sectors – social services, health care, early care and education, higher education, and others – have taken part in the Duluth-Proctor-Hermantown Thrive Initiative. The Northland Foundation has guided the Action Team through a process to gather information, raise awareness, and identify strategies to develop strong networks of services to support the healthy social and emotional well-being of young children and families. A vision and strategic action plan have been created, based on broad community input, including face-to-face interviews with 90 people, service mapping of available infant and early childhood mental health services, and local forums.

The Duluth-Proctor-Hermantown Thrive Initiative vision and strategic action plan serve as the road-map for action. The Action Team has formed six task forces to drive strategic action plan projects and programs forward. Implementation activities include creating a reflective consultation model engaging eight pilot sites that are working with young children 0-5 and their families; providing on-going professional development training, with an emphasis on offering educational seminars for physicians and law enforcement officials; and developing targeted outreach strategies for underserved families focused on promoting the social-emotional well-being of young children. The Thrive Initiative's efforts will build a stronger, more connected network of education, prevention, and intervention resources for early care and education providers, mental health and medical professionals, social service providers, and – most importantly – young children and their families.

The Minnesota Thrive Initiative is made possible from the generous support of the following: **Bush Foundation; Jay and Rose Phillips Family Foundation; Robins, Kaplan, Miller & Ciresi Foundation for Children, a supporting organization of the Minneapolis Foundation; Sheltering Arms Foundation; Mardag Foundation; and Medica Foundation.** The Northland Foundation, along with an array of local organizations provided additional support for the Duluth-Proctor-Hermantown Thrive Initiative.

What is Infant and Early Childhood Mental Health?

Infant and early childhood mental health is the developing capacity of a child from birth to age five to experience, regulate, and express emotions; form close and secure interpersonal relationships; and explore the environment and learn. Infant mental health refers to how these issues affect development in the first three years of life. Early childhood mental health is synonymous with healthy social and emotional development (*Zero to Three*).
